

## Four Founders Garlic Company

### Premium Garlic from India's Heartland

At Four Founders Garlic Company, we blend time-honored farming with modern export rigor to deliver top-quality garlic to global kitchens. Our tagline—*"Cultivated with Passion, Packed with Purity"*—captures our commitment: every garlic bulb and spice is nurtured by seasoned farmers and shipped under strict hygiene standards for unrivaled flavor and reliability. We cater to B2B importers, food distributors and restaurants in the UAE, offering consistent supply and transparent communication at every step.

### Our Story

Founded by four passionate farmers who share a vision of sustainable agriculture, Four Founders Garlic Company is built on unity, trust and a deep respect for the land. We come from India's fertile plains, where each founder brings unique expertise but a common mission: grow garlic naturally and ethically. Hand-harvested in nutrient-rich soil, our garlic is sun-dried and sorted by hand to preserve its flavor and purity. By working *directly* with local farming communities, we ensure fair, sustainable practices and full traceability from field to export. This farm-to-fork ethos underpins our brand—honest, earthy, and grounded in authentic craftsmanship.

## Our Products

Our product lineup showcases the versatility of premium Indian garlic. Each product is carefully processed and packed in export-grade packaging to preserve freshness:

- **Fresh Garlic:** Firm, aromatic white garlic bulbs harvested at peak ripeness. We grade bulbs by size for uniformity and pack them in ventilated cartons or mesh bags (5kg, 10kg, 20kg) designed for export <sup>1</sup>. Properly stored, our fresh garlic retains quality for up to 6 months <sup>2</sup>, making it ideal for wholesale supply chains.
- **Garlic Powder:** 100% pure dehydrated garlic finely ground (80–100 mesh) to lock in flavor. Our low-temperature drying process yields a low-moisture powder ( $\leq 6\%$  moisture) that is shipped in 25kg fiber drums or foil-lined sacks <sup>3</sup>. This export-quality powder stays shelf-stable for up to 24 months <sup>2</sup>, ensuring consistency for seasoning blends and food manufacturing.
- **Garlic Flakes:** Light, crunchy flakes made from premium garlic, processed to preserve natural aroma. Packaged similarly to our powder, flakes come in 10–25kg drums or cartons with moisture-proof lining, offering a convenient form for ready-to-use or further processing.
- **Garlic Paste:** Smooth, ready-to-use garlic paste (puree) retaining full natural aroma and nutrients. Our paste is filled into clean 5–10kg food-grade pails, perfect for foodservice and industrial kitchens. Each batch is prepared under hygienic conditions and frozen or chilled to maintain freshness.

## Why Choose Us

- **Certified Quality:** We comply with all international food safety standards. Our exports carry mandatory certifications (FSSAI, APEDA, Phytosanitary, etc.) to meet strict UAE import regulations <sup>4</sup>. Full lab analyses (residue tests, moisture checks) accompany each shipment for buyer confidence.
- **Farm-to-Factory Excellence:** By overseeing every step, we ensure purity and consistency. Our farmers use natural, chemical-free methods, and we handle procurement and processing

directly. In our modern facility, we employ low-temperature drying and automated hygiene protocols to preserve garlic's potency <sup>5</sup>. Advanced sorting and metal-detection machines further guarantee contaminant-free products.

- **Consistency You Can Trust:** Rigorous quality control is in our DNA. Every batch is graded by size, firmness and clove-to-bulb ratio by expert agronomists <sup>6</sup>. This hands-on grading means customers receive exactly what they order—no surprises. We maintain ISO-aligned processes (e.g. ISO 22000, HACCP) and are working towards all key export licenses, reflecting our commitment to reliability <sup>7</sup>.
- **Sustainable & Ethical:** Supporting our farming partners and the environment is paramount. We pay fair prices to growers, use eco-friendly farming cycles, and minimize waste. Our four-founder model embodies cooperative values—working together, we build a resilient supply chain that benefits both customers and communities.

## Export Capabilities

- **Scalable Supply & Custom Orders:** Whether you need a small trial order or multiple container loads, we have you covered. Our integrated farm network and processing lines are designed for large-scale production while maintaining strict quality controls. We welcome sample shipments so new buyers can verify our garlic firsthand, then easily scale up to large contract volumes.
- **End-to-End Logistics Support:** Exporting successfully is our expertise. We use durable, moisture-proof export cartons and pallets to protect goods in transit. Our team handles all documentation (Certificates of Origin, Phytosanitary Certificates, etc.) and works with reliable freight partners for timely delivery to UAE ports. In short, we provide a smooth export experience from our fields in India to your warehouse.
- **Consistent Delivery:** With year-round farming in key garlic-growing regions (e.g. Madhya Pradesh, Rajasthan), we ensure a steady flow of produce. You can count on regular shipments and transparent communication about schedules and tracking, so your supply chain never stops.

## Buyer Inquiry Form

Ready to start a conversation? Send us your details and requirements:

- **Name:** (Your name)
- **Company:** (Your organization)
- **Email & Phone:** (Best way to reach you)
- **Interest:** (e.g. Fresh Garlic, Powder, Flakes, Paste)
- **Quantity:** (Estimated order size)
- **Message:** (Any specific requirements or questions)

Submit this form and our export team will respond promptly to discuss your needs and provide a competitive quote.
